About Me

I'm **Tatiana Moreira**, a passionate full-stack developer with a strong background in creating seamless, engaging web experiences.

I'm a Full-stack developer with experience building scalable applications using React, Node.js, databases, and cloud systems.

Technical Skills

Front-End: React.js, Next.js, Remix, TypeScript, Tailwind CSS, CSS-in-JS, Apollo, Jest, Material UI, React Testing Library

Back-End: Node.js, Rust, GraphQL

Web3: Solana / [Web3.js](#)

Animation: Framer motion, ThreeJs

AI-related: Cursor, MCPs

Databases: PostgreSQL, MongoDB, Firestore, MySQL

Headless CMS & eCommerce: Shopify, Sanity

Other Tools: Git, GitHub Actions, Storybook, Google Cloud Platform, BigQuery, Bit.env

Professional Experience

Augeo – Full-Stack Developer

Aug 2025 – December 2025 | USA (Remote)

Augeo – Full-Stack Developer | Aug 2025 – Present | USA (Remote)

- Develop and maintain a reward system platform using React, Node.js, PostgreSQL, and MongoDB.
- Lead and contribute to the **migration from a monolithic architecture to a modern microservices ecosystem**, improving scalability, deployment velocity, and maintainability.
- Collaborate with product and design teams to translate client requirements into scalable, maintainable technical solutions.

- Deliver new features and improvements following Scrum methodology, ensuring consistent quality and timely releases.
 - Enhance performance and user experience through efficient API design, database optimization, and modern UI practices.
 - Contribute to code reviews, testing, and CI/CD processes for production-grade codebases.
 - Utilize **AI-powered IDEs and development tools (Cursor)** to accelerate development, improve code quality, and streamline architecture decisions.
-

Granicus – Web Developer

Jan 2025 – Jul 2025 | Costa Rica

- Maintained and customized Granicus CMS products for multiple clients, ensuring design consistency and responsiveness.
 - Translated **wireframes and prototypes** into accessible, performant user interfaces using advanced CSS techniques.
-

FrankieLabs – Web3 Full-Stack Developer (Contractor)

Jan 2024 – Aug 2024 | USA (Remote)

- Built and maintained a **Solana-based dApp** for a blockchain points reward system.
 - Integrated Solana smart contracts with front-end components via **solana/web3.js**.
 - Developed responsive, user-focused interfaces using **Tailwind CSS** and **atomic design principles**.
 - Implemented key blockchain interactions like **wallet connectivity**, **token transactions**, and **data retrieval**.
-

Parsley Health – Full-Stack Web Developer

Dec 2021 – Aug 2023 | USA (Remote)

- Contributed to multiple **Parsley Health** platforms, improving both front-end and back-end systems.
- Partnered with product managers and designers to deliver user-centric features with strong attention to **quality and documentation**.

- Led team meetings and **mentored new developers** to foster collaboration and maintain high coding standards.
-

TradeStation – Full-Stack Web Developer

Apr 2020 – Nov 2021 | San José, Costa Rica

- Developed a key product, **YouCanTrade**, contributing to both front-end UI and server-side functionality.
 - Ensured reliability and scalability by following modern coding and testing standards.
-

Proximity – Full-Stack Web Developer

Jun 2019 – Mar 2020 | San José, Costa Rica

- Built web applications with **reusable UI components** and REST APIs, focusing on performance and maintainability.
 - Played a key role in developing a **social job platform for professionals aged 45+**, influencing both UX and technical decisions.
 - Followed strong engineering practices — testing, pull requests, and peer reviews.
-

Softon – Front-End Developer

Oct 2018 – Apr 2019 | San José, Costa Rica

- Developed **reusable UI components** and managed application state using GraphQL and REST APIs.
 - Created test suites for UI components and data layers, working with IBM Carbon Components.
-

GreenCube – Front-End Developer

Dec 2016 – Oct 2017 | San José, Costa Rica

- Led front-end development for various web projects.
 - Designed and prototyped a **mobile app** connecting users with local handyman services.
-

Janeiro Digital – QA Engineer

Jul 2015 – Oct 2016 | San José, Costa Rica

- Automated functional and regression test cases using **Selenium**, improving test coverage and reliability.
-

Intel Corporation – Developer

Feb 2013 – Jun 2014 | Heredia, Costa Rica

- Built an internal web application for **issue tracking and reporting** of failed devices using jQuery, JavaScript, HTML, and CSS.
-

Education

Master's in Computer Science & Information Systems

Nanjing University of Information Science and Technology – Nanjing, China

Aug 2016 – Jun 2018

Bachelor's in Computer Science & Information Systems

National University of Costa Rica – Heredia, Costa Rica

Aug 2009 – Jun 2015
